Stay safe at home. Shipping Elementalist Lux is the common skin, which was released on November 28, 2016. Elementalist Lux is a very unusual skin, and these words are true, if only because Lux has ten shapes! Each match starts for the master in light uniform, but then everything changes. After using her magic on the opponent, she can receive the power of the elements. When the level of strength becomes sufficient, Lux is given the opportunity to transform into different shapes! By activating the radial shape over Lux's portrait, you can choose the elementary form! It is very difficult to describe this skin completely, all this is due to the incredible variety! Yes, there are similar elements between the forms, but each of them tries to stand out in a special way. Elementalist Lux dress, as well as her wand, change every time, as do the particles for them. This skin upgrades character abilities, strength, defense and movements in a far superior way that it would not be wrong to say with the right skillsets and expertise with Elementalist, you would be invincible. Now let's talk about animations and sounds for Lux. Skin has pretty impressive graphics updates with all new recall animations and extremely graceful attack movements combined with immersive 3D. Each shape has its own unique particles and effects that reflect their essence. Magma, for example, includes bright flares of fire flavored with ash. Nature, in turn, reveals Elementalist Lux with flowers, butterflies and beautiful bells ringing. The abilities have also undergone quite varied changes. Light binding is a luminous ball of pure energy. How to get Elementalist Lux in 2021? The skin is a bit on the pricy side and not easy to buy with a whopping 3250 RP, but you can't price good things and it's definitely worth those points if you're looking for a perfect skin. You can buy this great skin, like many others, in our store at a great price, with a lifetime warranty and instant delivery! Buy LoL Smurf Her League of Legends - Philippines izmanto Facebook. That's about \$25 for the skin and about \$30 for the Master Edition. That 3250 price is on par with the other three ultimate skins, making them the most expensive skins in the game. What comes with Master Edition? Elementalist Lux skin, Lux itself (if you don't already have the master) five icons and Elementalist ward skin. The icons represent her tier two forms - Darkness, Magma, Ice, Storm and Mystic. If you buy the skin before December 13, you will get a special edge around your loading screen disc (similar to PROJECT skins) and a special icon. 10 forms? How does it work? Elementalist Lux has 10 shapes: Light, Water, Fire, Air, Nature, Ice, Storm, Magma, Mystic and Dark. After building energy through attacking enemies, Lux can change its forms twice during the game. You start the game as the Light version of Elementalist Lux, and you can then choose between fire, nature, water or air. Later in the game you can transform again and combine the elements to get her final shape. The elements mix, so if you want Magma, for example, you need to combine Earth and Fire. What are the combinations? Magma - Fire + Nature Storm - Fire + Air Mystic - Water + Nature Ice - Water + Air Dark - Nature + Air Water + Fire (via SurrenderAt20) Can you play as all 10 forms in one game? No. You'll only play up to three forms per game, including the light form you start out with. What does it look like? You can see the skin splash art at the top of this page. Here's a video that both explains how it works and shows you what it looks like in the game: So I can really buy it now? Isn't that a joke? Yes, really! How often will it be in my games? Constantly. All. The. Time. Elementalist Lux FAQ ASKED FREQUENTLY WHAT KIND OF SKIN IS ELEMENTALIST LUX? Elementalist Lux is an ultimate skin, like Pulsefire Ezreal, Spirit Guard Beasts and DJ Sona.
